On this vote Mr. gineer proposed they should try their respect Wilson roted against the amendment. tive engines for "throwing distance, height, and quantity." ... " No," says the Barrie men, "we only came to throw quantity." Strange, if this was their object, they did not communicate it at the time of forwarding the chal-Piremen had learned to a certainty that Newmarket could beat them in distance from 30 to 40 feet; and as their engine was some

they determined on avoiding the issue by a trumped up pretext. Matters now assumed a pretty strong shape. Speeches, were made to the " crowd. y Mr Cooke, the gentleman who selected the Newmarket Engine, and also by Mr Dougall, the engineer of Barrie. Finally the challenge was given to throw upon the three and quantity, and accepted upon the part of Newmarket, provided the engine-that could tobacco since the stock is brought to the curing largely indulged in by our Barrie neighbors, took their position at the tank first, and with ling last. All the members present except 13- We repret to learn that a young man in out exerting themselves to the fullest extent,

of the engines owned in the " little villages,"

this trial, cast above 200 feet. After some little speechifying, as before Laws of which he had given notice were not remarked, between Mr. Cooke and Mr Dougall, the Barrie men went to another tank, and made two trials, at neither of which did we nuderstand, the bone was not broken. It they exceed 160 or 163 feet. On this fact was immediately dressed by a surgeon and the becoming known, one of the Bradford Mer. for a temporary Lock-Up, and report next young men is now doing as well as could be chants presented the Newmarket Company meeting. with a " new broom," indicative of their having swept everything clean before them. We should state, too, that Mr Marks, the manufacturer of the Barrio engine, was also present, and admitted to gentlemen of this place, that in height and distance, Cowing & Co.'s engine was superior, -he thought, however, the Barrie engine could throw more in quantity; but it does not lock reasonable to us an early opportunity will be given Barrie to )

Since writing the foregoing, the Barrie papers have come to hand, in which a com-THOS. SUMMERSETT, who complains bitterly of the Bradford Independent Company for the cool reception of the Barrie Brigade .-He then states what is positively untrue with regard to the capabilities of the Newmarket to receive them; and after purtaking of the engine, and falls foul of the New Era, deinties which the ladies of Sharon know so by denying there was any "trial," as we | well how to provide, as all can testify who atstated last week. But it so turns out that | tend their "feasts," and pie-nice, they betook we have the statements of the editor of the themselves in sight earnest to the sports of the paper in which Mr. SUMMERSETT 8 letter appears, to contradict him and prove "there was a trial." The editor heads his article-"Trial of Fire Engines;" and from this article we find statements like these; "in the several titals made, &c.;" "we had no means being anspended between two trees, about 30 In consequence of Larry demands upon us of excertaining the real distance of the New- | feet from the ground. The parents and guests in building a more catesairs pricticy office, market trial;" again, "another trial will from adjoining ecctions were then waited upon tre have to request our friends, with as little likely take place." So much for Mr. Sun. by the older pupils, and after all were satisfied, MERSETT's denial. He next makes a chal- there were taken up ceveral backets full of ing report :lenge for another trial, at \$100 a side. This, fragments. this office. The amounts due by each ere we understand, will be accepted by the Newmarket Company, as soon as they can get

which they will find to their east and merti-

We regret that, in the hurry of golog to According to promise we now proceed to press, the figures netting forew the distance thrown by the two Bradford engines got mixed up; but with regard to the others, they are strictly correct. It is said that on the third trial of the MARR's engine, she throw Marks of Torontof which took place at Bred- 160 or 168 feet, and hence we allowed it to ford on Thursday, of last week. The first pass for correct, and so quoted the Egures

We sum up the whole by saying, we beof a challenge in this matter, was an adver- lieve both ongines to be very good, and a 8.82 o.m. | tizement he the Barrie papers, setting forth | credit to their respective manufacturers; but the day above mentioned there was the fact that the first stroke of the Cowto a "Trial between the Engines An & Co.'s engine brings the water, which Barrio, Bradford, and Nowmar boxes are previously soaked, induce us to ket." This manner of throwing believe the former is the best engine, particudown the gauntlet was poculiarly characteris- larly when its power and force is taken into tic of there whole proceedings on the day of consideration. The Newmarket Company trial. The Barrie company, without con- meet to night, when the above challenge will

### . . Magietrates Courts.

On Friday last, one of the bardest cares gade to attend on the day named. Our for female character we ever heard of, was Northern neighbors being proverbial for that brought before R. H. Smith, Enq., J. P., clover commodity called "brag," no doubt charged with being Georde:ly to the public they thought the manner in which the chal- streets-using unbecoming and immoral lanlenge was given the Companies belonging to guege, &c. Two or three witnesses having speech of considerable length, adverted in his testified to the fact, the Justice imposed a fine and in case of hon payment, the prisoner was in what the trial should consist -or who were to be committed to Jait for, 21 days. She to be the judges, &c. But, as we just observ- preferred impriconment to paying the fine, ed, knowing the propensities of our northern although the appeared to have money. Durfriends to "brag," the little "villages," con- ing the trial the behaved in a most bedierous and obscene manuer-thier an intstand perous the room breaking it in pieces, and perpetrated sundry other actics. On monday last, Mr. Moreis was charged before the Reere and R. H. Smith, Esq. with improper conduct towards Mrs Barringer some days previous. After hearing the case, the Justices decided that Mr Morris should pay 85 fine for his fun. Newmarket is gettung to be a " fast town," notwithstanding Barrie thinks we are only a " little village."

Rumor Contradicted. For some time past a rumor has been in

### The Tobacco Crop.

The last isage of the N. Y. Tribune gives liten steamer Corcette DeLace, 6 guns, has ather unfavourable account of the crops in Kentucky-particularly of Tobacco and Wheat. Oats and Corn are considered an average crop, however, which, with the annual crop of "black-ivory" raised for the the 14th at 931 a 931. southern market, farmers will be able to make "both ends meet." We make the following extract from the Tribune :-

"The tobacco crop of Kentucky is spoken of as less than an average one, for various reasone. There was loss of an area planted especially near the river, as the almost total failtre of the wheat crop, and high price of corn in Soring, induced the farmers to plant more com and less tobacco. The season, too, has tieen of such a nature as to ripen the plants a fortnight or three weeks earlier than usual which is unfavourable to a great yield of cured

# Newmarket Council.

The above Council met on Monday even-Dr. Hunter-the Reeve in the chair.

The Clerk read the minutes of two precontest proved futile-Newmarket engine, at ceeding special meetings, which were confirmed. Dr. Hunter being absent the Byadvanced, and the business of the council was confined to the passage of one resolution, appointing the Recre to select a suitable place

The Council then adjourned.

A great nursery and plantation recent mineral discoveries in that district, of choice timber is greatly needed in Salt says :adopted and recommended to the Board of Lake Valley, and would afford a magnificent return. Meantime, the lucky inroad of the

Federal Army has obviated any present sense of need. Great provision waggons whose axles had borne the jerks and strains of twelve hundred miles of travel over unmade roads and unbridged gullies, bearing loads of two or three tuns, have been sold in profusion at face, and as the quartz in which it is found 820 each, and mainly brought in by the shrewd brother Brigham, who has recently gold lots of them back to easy Uncle Sam for \$150 each, to be used in moving the army to form a judgment in such matters, that rich Prince of Wales are nearly completed, to Texas and Arizona. That's how the

> money goes, The grape flourishes rarely in Utah. The Saints believe that their long, dry, bright summer causes it to yield a wine of a peculiar aroma and flavor. Its cultivation is being rapidly extended. The apple and pear also do well; though the prospect for fruit this season has been obscured by untimely frost.

Some new valleys have been recently opened to settlement-mainly north and east of the Salt Lake-that are greatly liked. They of course lie higher than the Lake Valley There will be a regatta on Lake Quiviva, and have a sharper climate; but they have and probably the Prince will drive round the also more wood, more water, better grass, and lake. In the evening, there will be a grand other allurements. They are rapidly filling

The great project of daming the Jordan few miles below its head in Lake Utah, and thus irrigating the greater portion of Salt Lake Valley, is yet in embryo. At present not a tenth part of that Valley is cultivated for want of water. The proposed dam, with consequent irrigating canals, would render that Valley one of the most productive of its size on eart's, beside affording water-power The following is the reply of His Royal for a great manufacturing village. With Righness to the address of the corporation of few such dams. Utah might easily support population of twenty millions. Her grand valleys need but water to render them of un-

equalled fertility.

The rumor of a proposed sale (or tender of sale) of their present possessions to the Fede ral Government, had probably just this foundation: There are many converts to the faith of the Saints now living in India, China Australia, and the other countries washed by the Pacific and Indian Oceans. These it is not convenient to gather to the Land of Pro-I go to the grat possessions of the Queen mise, yet they expect and desire that a place of use to me in ill my associations with my thes with reference to such location; but this

## Mining Pever.

(From the Three Rivers Inquirer July 21.)

The mining fever is evidently spreading and becoming more violent every week. - W understand there are large numbers of persons amounting it is said to hundreds-traversing the woods a few miles north of this city, dig Michael Lawlor, Esq., M.D., Associate | ging up stones in hope of lighting upon some precious metal. He theff proceeded to the Coneda cite;

". We have been shown specimens of copper ore obtained about 26 miles north of this place. The extent and richness of the mine of course is not yet known; but the fact that copper does exist there is put beyond doubt. The specimens before us are not it is true very rich, but they were found upon the surexists in immense quantities, and as the exploration has scarcely commenced no doubts are entermined by those who are competent and productive viens will yet be discovered. It is said that the indications on the surface are quite as promising as they were at the Acton mines which are yielding so largely. This discovery has been made on a property owned by T. Large, Esq., of this city, who we understand intends to commence mining operation on it in a short time.

THE VETERANS OF 1812 .- A meeting of the survivors of those engaged in defence of Canada during the wars of 1812, '13 and '14 took place at the Rossin House, Toronto, on Saturday. There was a large gathering, and among these present were Sir J B Robinson, Bart., Sir A. N. Macnab, Bart., Hon. Mr. Justice Meiean, Hon W. Il; Merritt, Col. Thomson, Col. Whitehead, etc. A committee was appointed to draft an address

to his royal Highness the Prince of Wales, and that said committee do communicate with his Royal Highness to know when and where it would be convenient for him to receive and address, and that the Hon. Sir J. B. Robinson be requested to present, tho same accompanied by as many of the survirors as can make it convenient to attend. The address will be placed in the hands of the Clerks of the Peace of the different counties for the signatures of the survivors .- Adrer.

There seems to be an opinion with the best informed portion of the press, that a general Election before the next meeting of parliament is not improbable. - But, at all events, it must take place shortly after the next meeting and hence, it is full time that the people of the Province-the people who oten the province and improve it, and support it, and have the principal interest in its welfare, should be preparing for the event. Never in the history of Canada, was there' such need of determined and united ection from the friends of the country, as on the present occasion, and we expect that the good men of all parties will; at least, agree on the necessity for a complete change of Legislators and their policy. Henceforth we will discourse to the men of Horon and Bruce on this highly important topic:- Huron Signal.

concluding portion of the address delivered by the Grand Master at the Masonic Confention at Ollaws on Wednesday last, in referring to the approaching visit of the Prince of Wales, the Grand Master feels assured that the Masonic fraternity of Canada will desire to testily their affection to the royal family of Est. lind by every proper and constitutional measty -His Royal Highness the Prince of Wales has especial claims upon our sympathetic affection and regard, on account of his Masonic connections. His illustrious grandfather the late Duke of Kent, was a Grand Manby of our ancient and venerable order, and one of the most interesting episodes in the history of Masonry in England, is that which recounts the soleum reconciliation of the two branches of the Masonic family, under the autoices of II. R. II. the Duke of Sussex. VICTORIA AND THE BIBLE .- It WAS & no-

THE MASONS AND THE PRINCE. - In the

ble and beautiful answer of our Queen-the Monarch of a free people, reigning more by love than by law, because seeking to reign in the fear of God-it was a noble answer the gave to an African Prince who sent an ambasisge with costly presents, and a-ked her in return to tell him the secret of England's glory; and our beloved Queen sent him, not the number of her fleet, not the number of her armies, not the account of her boundless merchandize, not the details of her inexhaustible wealth. She did not, like flezekish, in en evil hour. show the ambassador her dismonds and her jewels, and her rich orasments, but handing him a beautiful copy of the Bible, she said - " Tell the Prince that this is the secret of England's greatness." KENTUCKY WHEAT - Mr. Fowler has cut

down a fine sore field of Kentucky fell wheat, (which he had planted for the purpose of procuring the seed. The field was planted in the middle of September last, and but for the wet weather might have been harvested a week sgo. It is quite rips and full, and the repldity with which it ripens will render it a valuable grain-as it is almost sure to escaps the ravages of the wearil .- Peterbora' Re-

persons have taken for a poor joke is never ibdes a certain fact. Our Ministers und their deputies, it appears, are to be invested, at the visit of the Prince of Water, in a splen-NOTICE is hereby given that an Examination of Common School Teachers and others will did uniform Imported from England. We of Common Behool Teachers and others will thought it enough to see the shee buckels, silk steckings, the ruffles, and the twenty feet train to the rober with which the present Speaker moffes bimtelf, no doubt to the honour of his good taste, but also to the laughter of the persons the least addicted to laughing. It spective Trusteen. seems to us that we should be contented with that, without introducing costumes butherto unknown in this country, very expensive, and utterly usalers. If the example comes from Toronto, July 6, 1860. abore-if:the Ministera assume a court dress for official coremonies; there are a crowd of ischanapes always ready to go off at hall-cock, who know better how to display their calves then to fill, their heads, who will heaten to follow so magnificent an example and we shall

en a reduced scale ; but less the manners, less the good tasto, feer the wealth, and feer the prestige of traditions-in short, something of the kind so logenlously founded by the sublime Boulouque in Imitation of Napoleon I." Por APD KETTLE .- The Leader and the Colonist are at war. One maintelus that all the good things of the Government aught to Leenjoyed by the Hincksites, the other maintains that the Conservatives, and them alone, are entitled to live on the fat of the ministeriel kitchen .: A pretty quarrel certainly .-Hear what the Leader says to the Colonist : "A world of advice to our consumptive

coatemporary. Let the old lady not talk of theightly secreices, or unselfish conduct; for such terms ill become one whose charms have been stopped. been sold to the highest bidder a dozen times within half as many years; who has been the erateful recipient of the drippings from the Cabinet kitchen nidee 1858, and who nevertheless appears to be in the last stage of consumption, and is only awaiting the embrace of a new lover before she gives up the ghoat." The Colonist kicks against this very pretty picture, recollecting that but for Beattle jobs and road subsidies given to the Leader, con-

complice symptoms would long since have been developed in the Leader establishment. It is the pot calling the kettle black. Stickobial TENURE . -- The Gazette by authority, of the 14th instant, contains an anconcement by H. Judah, Esq., and N. Dum-14 Eig., Seigniories, thereinsfter enumerated,

are made up, and the value of the idemnity to the Seigniors fixed. Then follows a list of the aid Seigniories. The sum total of indemnity swarded to this time, including the prior lists published, amounts for lods et ventes and bun. dite, to \$2,196,233. There are several Seigniories whose cases are in appeal, the amount of indemnity on which the Court have not adjudicated on ; the sums awarded to the .n will, of course, go to awell the above amount of indemnity, which the people at large have to pay, to settle a question which in no way concerns any other persons than the land. lords and tenants of one section of the Province. - Montreal Transcript. COUNTY COUNCILS NOT WANTED .- We

perceive by the London Prototype that mosting was held a short time since in the Township of Wostminister, for the purpose of peritioning the Legislature to dispense. with Township and County Councile. Reselutious were passed to the effect that Counly and Township Councils are togensive, acd injurious to the bost interests of the pein that the taxes raised by the Councils ne wed for officers' fees, and not for the losto allowed to manage their own affairs at ditione expense, proship meetings as formerly.

many of bur readers. The origin of butter-making is unknown. Galen jin I others do not mention it as an ncticle of diet, and it is probable that neither | be obtained, the Greeks nor Romans employed it in cookcry, not set it upon their tables as food, in the same manner as it is enjoyed by me. As butter melts and becomes liquid in 90° Fals, this may account for the ignorance of ancient author- in to its use in cold countries in their day, lading the seals of ancient learning word of fined to warm climates, and geographic I knowledge was then very limited. Through the indomitable courage and enterprice of modern travellers we have been made acquainted with the customs and habils of playet all the tribes and nationscivilize I and savage no that we know of exceed six times, will cure, .... butter being used among many of the barbarous Arab and Tartar tribes inhabiting idoubt laons regions; and no doubt it has been harmy to them for many centuries, rapidly, and all heat be drawn out, The Tarter tribes inhabiting mountainous regions; and no doubt it has been known to ced by soids from cloth, calico, or any other cin bite er slung over the crapper of his pear. saddle, would perceive, after a hard ride, that there had gathered on its surface a rich yellow aubstance, unknown to him before, cext adjoining, in soft linea or cotten, firmly and which could have been produced from and let it remain. In a week the cure wil the mill, alone. The cause of its development would readily suggest itself, and its pleasant flavour would incite him to reproduce it in the same manner. This is the way butter is now churned by some of these abunadjo drijess. The milk is placed in a birg made of skin; the Tortor slings it across put away for . uze, the saddle, mounts his stead, and trots up his batter, . This we believe, could not have quarter of a pound of butter, seven eggs, a been the way butter was first discovered by a teaspoonfull of soda disolved in sour milk, the inhabitants of Western Europe, as their and as much flour as will make a soft dough. most ancient practice of churning consisted | Make them in rings, and bake in taid, in agitating the milk in wooden vessels; but how or when they discovered the art, we

olive oil holds the same place that butter does with us. As an article of diet, we are only acquainted with the butter made from the milk of the sheep, goat, buffalo, and ass, are known and used in various countries, respecially in Asia. Some tribes of Araba. use the butter (called ghee) of the buffalo which they drink clarified in a liquid state. In the East Indies there me breeds of goals which give a large quantity of milk; and among the hill tribes of the Himalaya mountidus they take the same place as the kine tribes with us. One of these goats, lately brought to this city from Calcutte, (and by Mormon family, strange to tell!) yielded on chipboard from hix to eight quarts of milk laily. We really hope that some of our enermising agriculturists, who have devoted a much attention to improving live stock, uch a valuable breed of animals. They can a raised and fed in mountainous regions will ordinarily effect a cure. here cows would starve. Their milk is ord, their flesh excellent, and their hair iskes strong and durable fabrics for cold suppon in some parts of Europe.

shall never know.

ther constituent-basein, angar, and some hour. ilts. It exists ready formed in the milk, as hat more, but by the latter superior butter stick out candied orange or lemon-peel on the s produced. It is our opinion that with lop, toper care there is little difference in the esults of the two systems. Grass-fed kine ield milk from which beautiful yellow butter gathered; on the contrary, stall-fed cows ive milk which yield a tallowy-looking buter. This letter kind of butter is oftentimes mpart their strong and peculiar flavor to milk, hour in a moderately bot oven. This is the case with turnips, which should

nd when cheap should be given freely. either with or without butter. lows which receive one meal per day of boil d or steamed food, during winter, yield at east one-third more milk than these which eceive only dry food, the condition of the ormer at the same time being much superior. Much has been said about the best methods f treating butter to preserve it sweet and road becoming rancid. Under ordinary cirumstances, there is no difficulty at all in the

natter; and yet the quantity of inferior (bad atter) in proportion to good butter, which omes into market is immensely large. As ll healthy, well-fed country kine, produce 60d milk, no bad butter should be found in r the use of horse power to churn even on the way ; try again, it's your last guess." form having no more than five come. After " Caught." -- " raid S. " you'r niong

and the same of the same

like that employed for clothes. After all the milk is thus equeezed out, the butter should be lifted and worked over carefully, and afterwards receive one or two clean, cool waters, to wash away every trace of milk. It should then he salted with the best salt, containing Opport our lady correspondents requests us a minute quantity of sugar mixed with it, and last of all it should again be submitted to govern pressure. The great object in thus that and information would be interesting to treating butter is to remove all the water and milk from it, because these induce incipient From time bomemorial, butter has been made By churning the ercom before it becomes too and the il by the natives of Western Europe, tour, and removing all the water and milk Little is said about it by ancient writers. from the batter, and by careful and thorough enling and working, the best quality will
